

# JedAI Cloud GPU-as-a-Service

At Define Tech, we specialise in deploying Cloud solutions, accelerated by a wide range of AMD GPUs optimised for performance and efficiency.

Our commitment to AMD isn't just about what the technology can do today; it's about what it will be able to achieve tomorrow.

David Power,  
CTO, Define Tech

**THE INCREASING DEMAND FOR HIGH-END COMPUTING RESOURCES IS FORCING COMPANIES ACROSS ALL VERTICALS TO RE-EVALUATE THEIR CURRENT INFRASTRUCTURE. MORE AND MORE COMPANIES ARE TURNING TO GPUS TO SPEED UP THEIR DATA-INTENSIVE WORKLOADS. JEDAI CLOUD'S GPU-AS-A-SERVICE OFFERING IN PARTNERSHIP WITH AMD, IS DESIGNED TO DELIVER UNPRECEDENTED GPU PERFORMANCE AT A COST-EFFECTIVE PRICE.**

## **WHAT IS GPU-AS-A-SERVICE**

A GPU-hosting service can provide scalable computing infrastructure at a fraction of the cost of building and maintaining an on-site infrastructure. This way, you can ensure computing resources meet your needs, without any under-utilisation or underinvestment, as your business grows.

## **WHY JEDAI?**

JedAI enables on-demand cloud infrastructure access with support for job scheduling (Slurm) and container management (Kubernetes) – all of which is GPU optimised, ensuring your infrastructure is accelerated, AI-optimised and efficient.

## **WHY AMD?**

We recognise the untapped potential in AMD hardware, and we have honed our expertise in optimising AMD GPUs, perfecting the balance between performance, cost-efficiency, and reliability.

## **DEFINE TECH'S GPU-AS-A-SERVICE VALUE-ADD**

With multiple years of experience in the cloud computing industry, our team has a proven track record of delivering outstanding results. Our experts are

## JEDAI CLOUD FEATURES

Multiple European  
Locations

Powered by  
Renewable Energy

Cost-Effective  
and Scalable

Security you  
can Trust

Kubernetes and  
SLURM on Demand
